

**Description:**

The single mode optic fibers are positioned in a loose tube made of a high modulus plastic. The tube is filled with a water resistant filling compound. The tube is wrapped with a layer of steel tape. Between the steel tape and the loose tube, water blocking material is applied to keep the cable compact and watertight. Two parallel steel wires are placed at the two sides of the steel tape. The cable is completed with a PE sheath.

Features:

- good mechanical and temperature performance
- good crush resistance and flexibility performance
- good rodent protection
- small diameter, light weight and easy installation

Compliances:

- ITU-T G651/G652 D
- ANSI/TIA 568-B.3
- IEC-794
- RoHS

Applications:

- suitable for aerial and duct installation
- outside plant environments
